

Innovative Solutions. Trusted Performance.
Intelligently Engineered.

Government Talking Points

- Bandwidth management –
 - Utilize current bandwidth to their full extent instead of purchasing additional
 - May be able to cut some of their current connections by fully utilizing their bandwidth
- Load balancing, Never Down™, redundant connections –
 - Government agencies require a reliable, fast network they can depend on
 - Smooth operations and the ability to relay important information without interruption
- Automatic Failover –
 - Get systems back up and running without needing an on-site IT administrator
 - Constant quality and uptime in their call center and dispatch environments
