

Innovative Solutions. Trusted Performance.  
Intelligently Engineered.

### Engineering Talking Points

- Never Down™ –
  - Keep remote sites connected to the network
  - Prevent loss of business due to ISP interruptions
- Traffic Prioritization –
  - Business-critical applications are pushed through ahead of personal items such as video streaming
- Load balancing –
  - The ability to run multiple applications without congestion and slow downs
- Built in VPN capabilities –
  - Login stability
  - Secure connections between sites for remote users
